

Daily Git Push Workflow (Cheat Sheet)

1. Check branch:

`git branch`

2. Check changes:

`git status`

3. Stage:

`git add .`

or

`git add path/to/file`

4. Commit:

`git commit -m "message"`

5. Push:

`git push`

If remote missing:

`git remote -v`

`git remote add origin https://github.com/Mapwala/Mapwala_MIS_Backend.git`

If no upstream:

`git push -u origin backend`

Push other branch:

`git checkout branch-name`

`git push -u origin branch-name`
